SUMMARY

Enthusiastic full-stack software developer with experience in building applications with real-world use and leveraging the benefits of agile development environments.
Skilled in frontend development with technologies like React.js and Next.js, as well as backend technologies like Node.js and both relational and document databases. Known for a problem solving attitude and collaboration skills.

EXPERIENCE

Software Developer Graduate   02/2024 - 08/2024

Boolean UK   Remote

- Completing 6 months full time 1000+ hours of intensive full stack software development bootcamp.
- Gained hands-on experience building real-world applications with React, Node.js, Express.js and other JavaScript based frameworks, as well as backend technologies like Prisma, PostgreSQL, MongoDB, Redis, as well as other APIs and libraries.
- Led small teams in agile environments to develop fullstack applications.
- Contributed by helping to solve problems and answer questions from other teams.

Freelancer   01/2023 - 03/2024

Self Employed   Remote

- Freelancer at Upwork.
- Implemented various frontends for drop-shipping stores, online services and blogs using technologies like React, or through web services like WordPress and Shopify.
- Worked with other people responsible for the design aspect of the website, SEO and ads.

PROJECTS

Personal Portfolio

This is my software developer portfolio, showcasing some real life and fictive projects I worked on in order to strengthen my coding skills.
- Tech stack: React.js, TailwindCSS
🔗 https://rafa-lopes.netlify.app/

Tea Shop E-commerce Store

Fictive project showcasing the whole development process from a client request to a final full stack working application, including design and user flow documents.
- Tech Stack: React.js Node.js Sass.
- This project focuses more on the front end skills, developing common UI components from scratch, like dialogs and accordions as opposed to using pre-made 3rd party libraries like Bootstrap.

NPM Package: simple-http-codes

Created a NPM package that provides useful information about HTTP codes, and enhances developers workflow by not only providing code autocompletion but also by providing helpful information about HTTP status codes on the site.
- Public NPM package available on a public registry
